

T-HOTBOX PDR

□

Description

The T-Hotbox PDR is an innovative dent removal tool, which includes several new aspects. Next to the adjustable time and power settings on the unit, the Small Heat Pen T vibrates when activated. This also helps to pull up the dent. A further advantage is the small size of the unit itself which is the key to an easy application. The handheld T-Hotbox comes with a 5 meter power cabel and a case to make the transport easier. The main application is for small and soft dents. Furthermore it can be used for a wave or area damage on a panel or as a finishing tool for any PDR technician. Generally speaking it is a great tool to make most dents smaller without much experience. This makes it an ideal tool for any bodyshop as well. Next to that it is also used to shrink overstretched metal as no paint needs to be removed with it.

Benefits

- Handy size
- long cable for flexible working
- High Quality
- Adjustable Setting
- Adjustable impulse energy
- Adjustable impulse time

Scope of delivery

- T-Hotbox unit
- Heat Pen T
- Cable
- Robust case
- Manual

Technical data

Supply Voltage	230 V (max. 250 V rms)
Frequency	50/60 Hz
Protection	T 6,3 A
Performance	max. 1100 VA
Power factor	> 0,95

Dimensions & Weight

L x W x H	21,00 cm x 11,00 cm x 11,50 cm
Weight	1,3 kg
