

PRESS-IT 2.0 HANDLE

Description

With the PRESS-IT 2.0, holes for PDCs (park distance controllers) can be easily, quickly and precisely punched into bumpers. The holes are punched after painting, because the paint is pulled into the hole and thus, it will not be damaged. The result are clean and smooth edges that do not interrupt the sensitive parking sensors. In line with the new design of PRESS-IT, the PRESS-IT 2.0 our handle was further developed as well. Now you need, through the improved ball bearing less force for punching the holes. In matter of design and haptic we brought the handle to a new level to optimize your feeling of joy and comfort while working. Natural we chose best tool steel for this.

Benefits

- Easy and professional punching of holes, according to the requirements of most automobile manufacturer
- With the right cutter a custom-fit hole is punched into the bumper

Scope of delivery

- PRESS-IT 2.0 handle
- Ball-bearing
